Why Libya ?

The oil, gas is one of Libya's main sources of income as it directly contributes to the country's economic growth. In addition to various other natural resources and a strategic geographical location.

To develop and modernize the infrastructure of the various energy industry as well as increase production levels, the Libyan government is working to invest heavily in the development of the oil, gas and to increase production until it reaches three million barrels of oil per day and ten thousand megawatts of electric energy in the next three years.

In general, the general indicators for the oil & gas in Libya for the coming decades are considered high due to the large government investments and reserves owned by the Libyan state, which is number one at the African level and tenth in the world.

As for Libya's natural gas reserves, Libya has one of the largest gas reserves in the region, estimated at 53 trillion cubic feet, and exploration operations are continuing to complete the work.

WHY LIBYA OIL & GAS EXPO ?

The Libya Oil & Gas Exhibition in its fourth session provides an important opportunity to continue developing businesses, build new relationships and exchange knowledge about the latest products, technologies and tools that contribute to raising the quality of the Oil and gas sector at the local, regional and international levels, and the event also brings together thousands of businessmen, policy leaders, decision-makers and Libyan and foreign sovereign bodies to communicate and work together on commercial partnerships to push investment opportunities towards new horizons that serve the country.
